IRIDIUM GO!® HITS DEMAND MILESTONE OF 50,000 UNITS

Beam Communications Holdings Ltd (ASX: BCC) is pleased to announce that it has received its eighth order for manufacturing of the Iridium GO! from leading satellite services company **Iridium Communications Inc** (NASDAQ: IRDM).

The Iridium GO! continues to be a popular choice for consumers headed off-the-grid, even after six years of sales. The order for an additional 5,000 Iridium GO! units will take the total number of units manufactured by Beam to 50,000 since the device's debut in mid-2014. Beam expects to commence shipment of the latest order in the second half of FY21.

Michael Capocchi, the Chief Executive Officer of Beam, said: "We have expanded our manufacturing for the Iridium GO! Device, adding Malaysia and China. This ensures Beam can cope better with any potential supply chain disruptions or other unpredictable events."

"The bushfires, hurricanes, and earthquakes that we are experiencing around the world have also highlighted the need for a communications tool that doesn't require ground infrastructure. The Iridium GO! is perfect for a wide range of applications including email, weather, voice communication, and SOS for emergencies."

Yours faithfully,

Dennis Payne
Chief Financial Officer & Company Secretary
